

Obtaining your sp_dc cookie

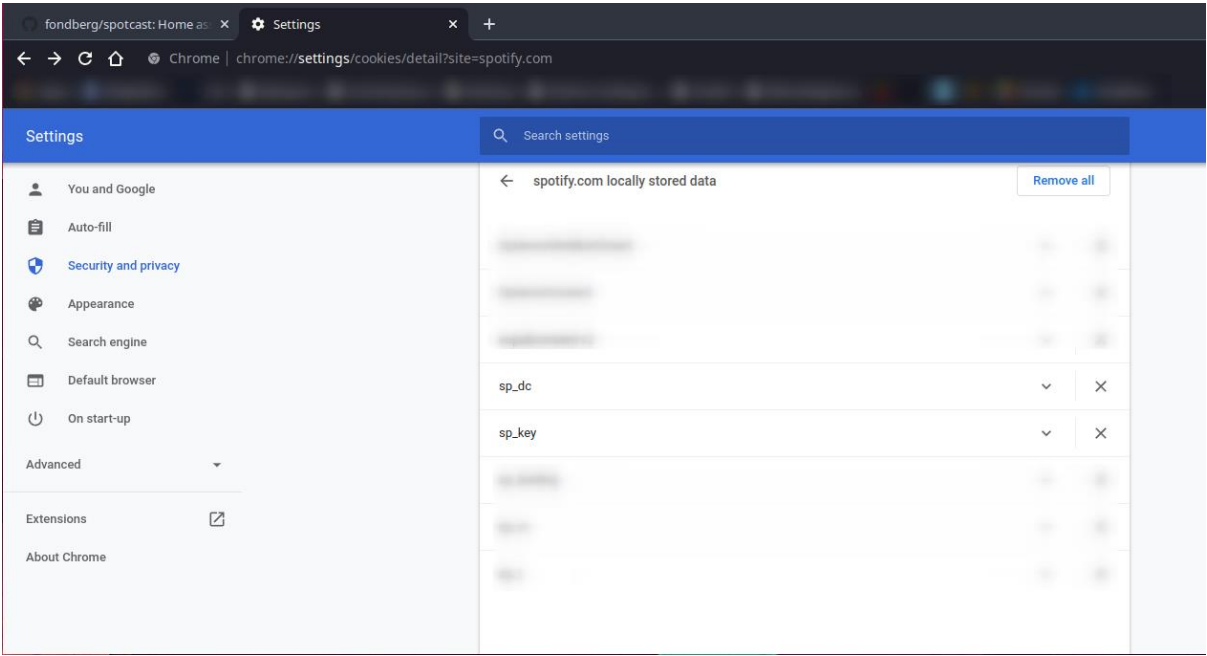

To authenticate against Spotify and view friend activity, your sp_dc cookie is required.

To obtain the cookie, these different methods can be used:

Chrome based browser (incl. Edge, Opera)

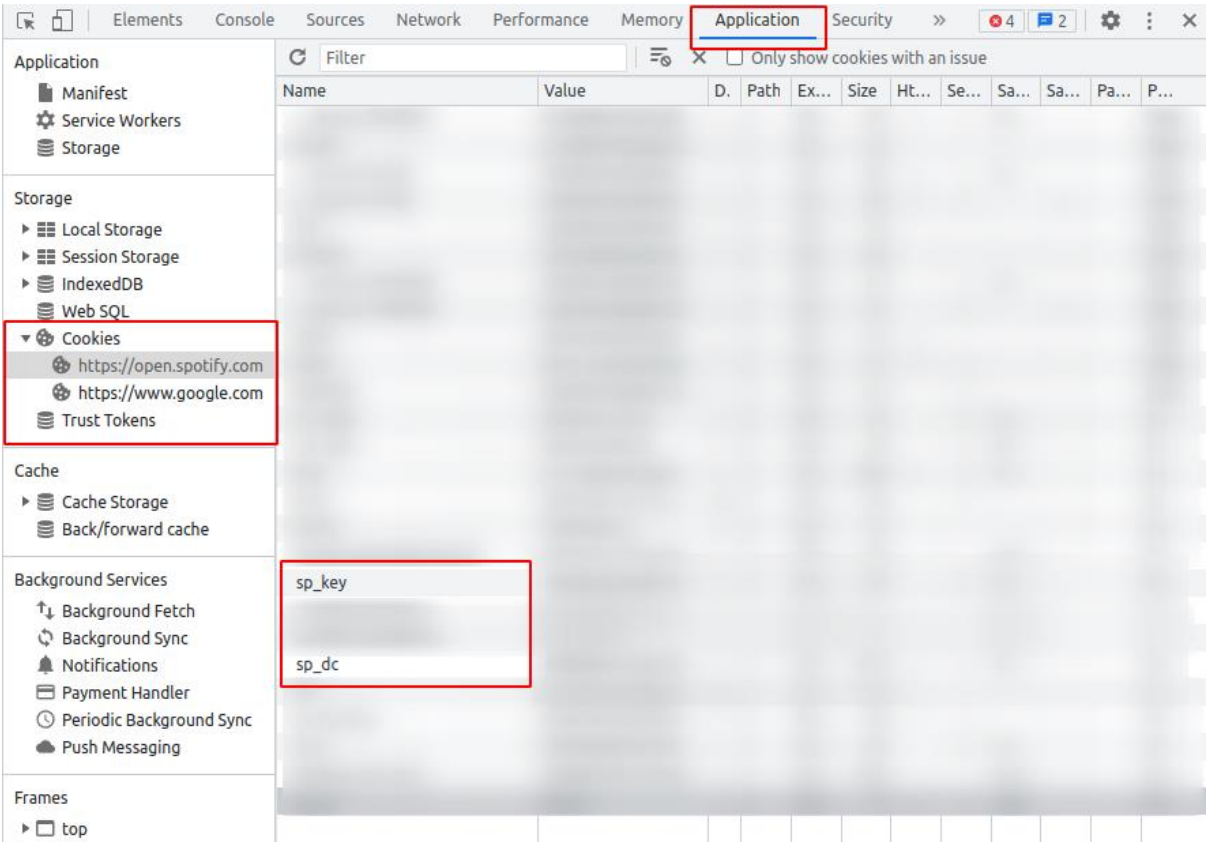

Settings page

- 1. Make sure you are connected on <https://open.spotify.com>
- 2. Open the url chrome://settings/cookies/detail?site=spotify.com
- 3. Copy the content from the sp_dc cookie

Web Console

- 1. Make sure <https://open.spotify.com> is opened and you are connected
- 2. Press Command+Option+I (Mac) or Control+Shift+I or F12. This should open the developer tools menu of your browser.
- 3. Go into the application section
- 4. In the menu on the left go into Storage/Cookies/open.spotify.com
- 5. Find the sp_dc and copy the value

Firefox based browser (incl. Safari)

Web console

- 1. Make sure <https://open.spotify.com> is opened and you are connected
- 2. Press Command+Option+I (Mac) or Control+Shift+I or F12. This should open the developer tools menu of your browser.
- 3. Go into the storage section. (You might have to click on the right arrows to reveal the section)
- 4. Select the cookies sub-menu and then https://open.spotify.com
- 5. Find the sp_dc and copy the value
